10-week full-time placement - standard 3 August - 9 October 2026; preferred September start requires EAAA alignment

PROFILE

Multimedia Design student at Business Academy Aarhus who turns user and business questions into clear, accessible digital products. I combine research, UX/UI, frontend implementation, and practical product thinking and seek an academy-approved 10-week full-time placement. The standard period is 3 August - 9 October 2026; my preferred September start is outside the normal path and requires case-specific EAAA alignment. By separate agreement, the collaboration can continue into the final project. If there is a mutual fit, I am very interested in continuing in a permanent junior role through a separate employment agreement.

EDUCATION AND EXPERIENCE

Multimedia Design

Final semester: 2026

Business Academy Aarhus (EAAA)

The final semester combines a 10-week company placement with a final multimedia project. Focus: UX/UI, frontend development, digital products, and web commerce.

Independent digital product work

Selected project evidence

Researching, designing, building, and verifying independent digital products, brand systems, and commerce experiences documented in the projects below.

SELECTED EVIDENCE

Min Børnehave (minbørnehave.dk)

2026

Independent childcare discovery product: user flows, responsive React UI, accessibility, privacy, Firebase, and live QA.

minbørnehave.dk

Volume Village

2025

Student team collaboration with Aarhus Volume: research, segmentation, sitemap, user flow, frontend, accessibility, and usability tests.

updated-volume-village.vercel.app

EILLON

2026

Independent brand and commerce system: responsive experience, Stripe checkout, waitlist/admin flows, and operational verification.
